

I-SWEEEP

International Sustainable World
Energy Engineering Environment
Project Olympiad

Eligibility & Limitations

CODE OF ETHICS

In all steps of a scientific research, the researchers must maintain integrity. Researchers will avoid any scientific misconduct such as falsifying data, plagiarism, or using the works of other researchers. Such projects will fail to compete in I-SWEEEP.

ELIGIBILITY/LIMITATIONS

1. I-SWEEEP is open to both, US students and international students, attending grades 9 through 12.

2. A project can qualify for I-SWEEEP in two ways:

I. Direct Qualification from regional, state, or national science fairs: I-SWEEEP collaboratively works with science fair coordinators in order to make this work. These projects are judged by the fair organizations in which I-SWEEEP provides them with instructions on how to do so. The award packets that include the invitation letters and certificates are sent to the fair directors. They are to be issued to the winners by the regional, state, or national science fair. Once these projects have been awarded to the students, this means they have qualified to attend I-SWEEEP and have **Ten Days** to register or contact us.

U.S. Partner Organizations

International Partner Organizations

II. Individual Applications: The projects that are not recognized by fair organizations may also apply for I-SWEEEP. Those projects are expected to compete in a regional, state, or national science fairs prior to I-SWEEEP. I-SWEEEP Scientific Review Committee evaluates the applications and notifies the students of their eligibility to participate in I-SWEEEP. **(Please keep in mind that your project has to be qualified by our Scientific Review Committee)**

3. The student should be *under twenty-one years* of age as of April 1st in the year of participation.
4. A student, or group of students, may not exhibit more than one project each year.
5. The project should be done within the last 12 months before the students application is submitted **(Finalized)**.
6. An exhibit cannot be entered to participate at I-SWEEEP for more than one year without significant changes.
7. Team projects may have a maximum of **three** members but I-SWEEEP will **only cover the expenses for two members**. As long as the third member pays for their own expenses they may attend the fair and present their project with the rest of the team. If one of the team members cannot participate in I-SWEEEP, the project can be presented by the other team member if possible. **(If you have any questions regarding this please feel free to contact us)**
